JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Abrading electrode
Passivation kinetics of surface films formed on a graphite electrode in organic lithium salt solution as a function of salt anion type (Ryu, Pyun) 97

Bode scheme
Structural and electrochromic properties of sol-gel derived Ni(Si)-oxide films (Šurca et al.) 57

Carbonate ions
Identification and electrochemical characterization of in situ produced and added reduced oxygen species in molten $Li_2CO_3 + K_2CO_3$ (Cassir et al.) 195
Charge transport
Impedance analysis of poly(o-phenylenediamine) electrodes (Martinusz et al.) 1
Chronoamperometric current transients
Three-dimensional random walk simulation of diffusion controlled electrode processes: (II) Arrays of growing hemispheres (Nagy, Denuault) 175
Chronoamperometry
An improved procedure for the processing of chronoamperometric data: application to the electrodeposition of Cu upon (100) n-GaAs (Vereecken et al.) 19
Study of the initial stages of silver electrocrystallisation from silver thiosulphate complexes. Part I: Modelling of the silver nuclei formation during the induction period (Simons et al.) 141
Commercial apparatus
A novel model of the hanging mercury drop electrode (Moncelli, Becucci) 91
Comparison
A novel model of the hanging mercury drop electrode (Moncelli, Becucci) 91
Conducting polymers
Electrochemical quartz crystal microbalance studies of the electrodeposition and subsequent cross-linking of poly(N-vinylcarbazole) films (Skompska, Hillman) 127
Conductivity
Studies of changes of pH, H^+ ion limiting current, conductivity and temperature during sol–gel processes in a TMOS system (Breiter, Fafilek) 107
Cross-linking
Electrochemical quartz crystal microbalance studies of the electrodeposition and subsequent cross-linking of poly(N-vinylcarbazole) films (Skompska, Hillman) 127
Cu on (100) n-GaAs
An improved procedure for the processing of chronoamperometric data: application to the electrodeposition of Cu upon (100) n-GaAs (Vereecken et al.) 19
Current transient
Passivation kinetics of surface films formed on a graphite electrode in organic lithium salt solution as a function of salt anion type (Ryu, Pyun) 97
Cyclic voltammetry
Reversible dimerization of 3,3′,5,5′,-tetramethyl-2,2′-bithiophene cations (Tschuncky et al.) 223

Cytochrome c
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135

Diffusion layer
Identification and electrochemical characterization of in situ produced and added reduced oxygen species in molten $Li_2CO_3 + K_2CO_3$ (Cassir et al.) 195
Dioxygen reduction
Application of a platinum dual-disk microelectrode to measurement of the electron transfer number of dioxygen reduction (Huang et al.) 33
4,4′-Dithiodipyridine
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135
Dual-disk microelectrode
Application of a platinum dual-disk microelectrode to measurement of the electron transfer number of dioxygen reduction (Huang et al.) 33

Electrocatalysis
Electrochemical oxidation of L-cysteine catalyzed by 10-ethylphenothiazine (Tong et al.) 121
Electrochemical and color impedance
Color impedance and electrochemical impedance studies of WO_3 thin films: Behavior of thinner films in non-aqueous electrolyte (Kim et al.) 9
Electrochemical and spectroscopic methods
Sensitivity of poly 1,8-diaminonaphthalene to heavy metal ions – electrochemical and vibrational spectra studies (Pałys et al.) 41
Electrochemical cells
Design of liquid|liquid electrochemical cells (Watts et al.) 207
Electrochemical devices
Ni(III) doped NiO as the electrode material for electrochemical devices employing protonic conductors (Palombari, Pierri) 213
Electrochemical impedance spectroscopy
Impedance analysis of poly(o-phenylenediamine) electrodes (Martinusz et al.) 1
Electrochemical polymerization
Effect of anion concentration on the kinetics of electrochemical polymerization of pyrrole (Li) 181
Electrochemical quartz crystal microbalance
Electrochemical quartz crystal microbalance studies of the electrodeposition and subsequent cross-linking of poly(N-vinylcarbazole) films (Skompska, Hillman) 127
Electrochromic effect
Structural and electrochromic properties of sol-gel derived Ni(Si)-oxide films (Šurca et al.) 57
Electrochromism
Color impedance and electrochemical impedance studies of WO_3 thin films: Behavior of thinner films in non-aqueous electrolyte (Kim et al.) 9
Electrocrystallisation
Study of the initial stages of silver electrocrystallisation from silver thiosulphate complexes. Part I: Modelling of the silver nuclei formation during the induction period (Simons et al.) 141

Electrodeposition processes
Three-dimensional random walk simulation of diffusion controlled electrode processes: (II) Arrays of growing hemispheres (Nagy, Denuault) 175
Electron transfer
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135
Electron transfer number
Application of a platinum dual-disk microelectrode to measurement of the electron transfer number of dioxygen reduction (Huang et al.) 33
Ethanol + water mixtures
Ionic equilibria in aqueous organic solvent mixtures. The equilibria of HF in an ethanol + water mixture used for cleaning up semiconductors (Ràfols et al.) 77
10-ethylphenothiazine
Electrochemical oxidation of L-cysteine catalyzed by 10-ethylphenothiazine (Tong et al.) 121

Factorial design
Factorial design optimization of redox properties of methylene blue adsorbed on a modified silica gel surface (Rocha et al.) 73
Fluoride-ion-selective electrode
Ionic equilibria in aqueous organic solvent mixtures. The equilibria of HF in an ethanol + water mixture used for cleaning up semiconductors (Ràfols et al.) 77
Free radical
Electrochemical oxidation of L-cysteine catalyzed by 10-ethylphenothiazine (Tong et al.) 121

Glass electrode
Ionic equilibria in aqueous organic solvent mixtures. The equilibria of HF in an ethanol + water mixture used for cleaning up semiconductors (Ràfols et al.) 77
Gold electrode
Identification and electrochemical characterization of in situ produced and added reduced oxygen species in molten $Li_2CO_3 + K_2CO_3$ (Cassir et al.) 195
Graphite electrode
Passivation kinetics of surface films formed on a graphite electrode in organic lithium salt solution as a function of salt anion type (Ryu, Pyun) 97

Hanging mercury drop electrode
A novel model of the hanging mercury drop electrode (Moncelli, Becucci) 91
Heavy metal ions
Sensitivity of poly 1,8-diaminonaphthalene to heavy metal ions – electrochemical and vibrational spectra studies (Pałys et al.) 41
pH Electrode
Studies of changes of pH, H^+ ion limiting current, conductivity and temperature during sol–gel processes in a TMOS system (Breiter, Fafilek) 107
Home-built apparatus
A novel model of the hanging mercury drop electrode (Moncelli, Becucci) 91
Hydrofluoric acid
Ionic equilibria in aqueous organic solvent mixtures. The equilibria of HF in an ethanol + water mixture used for cleaning up semiconductors (Ràfols et al.) 77

ac-Impedance spectroscopy
Passivation kinetics of surface films formed on a graphite electrode in organic lithium salt solution as a function of salt anion type (Ryu, Pyun) 97

Induction period
Study of the initial stages of silver electrocrystallisation from silver thiosulphate complexes. Part I: Modelling of the silver nuclei formation during the induction period (Simons et al.) 141

Kinetics
Effect of anion concentration on the kinetics of electrochemical polymerization of pyrrole (Li) 181
Reversible dimerization of 3,3′,5,5′,-tetramethyl-2,2′-bithiophene cations (Tschuncky et al.) 223

L-cysteine
Electrochemical oxidation of L-cysteine catalyzed by 10-ethylphenothiazine (Tong et al.) 121
Liquid|liquid interfaces
Design of liquid|liquid electrochemical cells (Watts et al.) 207

Lithium rechargeable battery
Passivation kinetics of surface films formed on a graphite electrode in organic lithium salt solution as a function of salt anion type (Ryu, Pyun) 97
Luggin capillaries
Design of liquid|liquid electrochemical cells (Watts et al.) 207

11-Mercaptoundecanoic acid
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135
Methylene blue
Factorial design optimization of redox properties of methylene blue adsorbed on a modified silica gel surface (Rocha et al.) 73

Microelectrode
Studies of changes of pH, H^+ ion limiting current, conductivity and temperature during sol–gel processes in a TMOS system (Breiter, Fafilek) 107
Modified electrode
Factorial design optimization of redox properties of methylene blue adsorbed on a modified silica gel surface (Rocha et al.) 73
Modified gold electrode
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135
Modified silica
Factorial design optimization of redox properties of methylene blue adsorbed on a modified silica gel surface (Rocha et al.) 73
NAD
Surface-enhanced near-infrared Raman spectroscopy of nicotinamide adenine dinucleotides on a gold electrode (Xiao et al.) 49
NADPH-cytochrome P450 reductase
Electrochemical investigations of the intermolecular electron transfer between cytochrome c and NADPH-cytochrome P450-reductase (Jin et al.) 135
Near-infrared Raman spectroscopy
Surface-enhanced near-infrared Raman spectroscopy of nicotinamide adenine dinucleotides on a gold electrode (Xiao et al.) 49
Ni(III)
Ni(III) doped NiO as the electrode material for electrochemical devices employing protonic conductors (Palombari, Pierri) 213
Ni(Si)-oxide films
Structural and electrochromic properties of sol-gel derived Ni(Si)-oxide films (Šurca et al.) 57
Nucleation and growth
An improved procedure for the processing of chronoamperometric data: application to the electrodeposition of Cu upon (100) n-GaAs (Vereecken et al.) 19

Oxygen reduction process
Identification and electrochemical characterization of in situ produced and added reduced oxygen species in molten $Li_2CO_3 + K_2CO_3$ (Cassir et al.) 195

Poly(1,8-diamino naphthalene)
Sensitivity of poly 1,8-diaminonaphthalene to heavy metal ions – electrochemical and vibrational spectra studies (Palys et al.) 41
Polymer film electrodes
Impedance analysis of poly(o-phenylenediamine) electrodes (Martinusz et al.) 1
Polymerization mechanism
Effect of anion concentration on the kinetics of electrochemical polymerization of pyrrole (Li) 181
Poly(N-vinylcarbazole)
Electrochemical quartz crystal microbalance studies of the electrodeposition and subsequent cross-linking of poly(N-vinylcarbazole) films (Skompska, Hillman) 127
Poly(o-phenylenediamine)
Impedance analysis of poly(o-phenylenediamine) electrodes (Martinusz et al.) 1
Protonic conductors
Ni(III) doped NiO as the electrode material for electrochemical devices employing protonic conductors (Palombari, Pierri) 213
Pyrimidine
Scanning tunneling microscopy of uracil monolayers self-assembled at the solid‖liquid interface (Sowerby, Petersen) 85
Pyrrole
Effect of anion concentration on the kinetics of electrochemical polymerization of pyrrole (Li) 181

Quartz crystal impedance
Electrochemical quartz crystal microbalance studies of the electrodeposition and subsequent cross-linking of poly(N-vinylcarbazole) films (Skompska, Hillman) 127

Radical ions
Reversible dimerization of 3,3′,5,5′,-tetramethyl-2,2′-bithiophene cations (Tschuncky et al.) 223
Random walk simulation
Three-dimensional random walk simulation of diffusion controlled electrode processes: (II) Arrays of growing hemispheres (Nagy, Denuault) 175
Reaction mechanism
Reversible dimerization of 3,3′,5,5′,-tetramethyl-2,2′-bithiophene cations (Tschuncky et al.) 223
Scanning tunneling microscopy
Scanning tunneling microscopy of uracil monolayers self-assembled at the solid‖liquid interface (Sowerby, Petersen) 85
Semiconductor electrochemistry
An improved procedure for the processing of chronoamperometric data: application to the electrodeposition of Cu upon (100) n-GaAs (Vereecken et al.) 19
SERS
Surface-enhanced near-infrared Raman spectroscopy of nicotinamide adenine dinucleotides on a gold electrode (Xiao et al.) 49
Silver thiosulphate complexes
Study of the initial stages of silver electrocrystallisation from silver thiosulphate complexes. Part I: Modelling of the silver nuclei formation during the induction period (Simons et al.) 141
Simulation parameters
Three-dimensional random walk simulation of diffusion controlled electrode processes: (II) Arrays of growing hemispheres (Nagy, Denuault) 175
Sol-gel
Studies of changes of pH, H^+ ion limiting current, conductivity and temperature during sol–gel processes in a TMOS system (Breiter, Fafilek) 107
Spectroelectrochemistry
Surface-enhanced near-infrared Raman spectroscopy of nicotinamide adenine dinucleotides on a gold electrode (Xiao et al.) 49
Surface-area measurement
A novel model of the hanging mercury drop electrode (Moncelli, Becucci) 91

Temperature
Studies of changes of pH, H^+ ion limiting current, conductivity and temperature during sol–gel processes in a TMOS system (Breiter, Fafilek) 107
Thin amorphous WO_3 films
Color impedance and electrochemical impedance studies of WO_3 thin films: Behavior of thinner films in non-aqueous electrolyte (Kim et al.) 9
Thiophens
Reversible dimerization of 3,3′,5,5′,-tetramethyl-2,2′-bithiophene cations (Tschuncky et al.) 223
Thymine
Scanning tunneling microscopy of uracil monolayers self-assembled at the solid‖liquid interface (Sowerby, Petersen) 85
Transients
An improved procedure for the processing of chronoamperometric data: application to the electrodeposition of Cu upon (100) n-GaAs (Vereecken et al.) 19
Two-dimensional arrays
Scanning tunneling microscopy of uracil monolayers self-assembled at the solid‖liquid interface (Sowerby, Petersen) 85

Uracil
Scanning tunneling microscopy of uracil monolayers self-assembled at the solid‖liquid interface (Sowerby, Petersen) 85
